

Supporting people diagnosed with Guillain-Barré Syndrome (GBS) or Chronic Inflammatory Demyelinating Polyneuropathy (CIDP) or other Inflammatory Neuropathies.

The Inflammatory Neuropathy Support Group of Victoria Inc (IN Group) is a registered charity ([77954503188](#)) that has been formed to:

- Provide support to patients, their families and friends;
- Promote financial support for the group and related activities (eg medical research).

Inflammatory Neuropathies

Inflammatory neuropathies typically destroy the outer layer of the nerve sheath. They are usually demyelinating neuropathies characterised by the infiltration of peripheral nerves with lymphocytes and macrophages, cells that are associated with inflammation.

The most common inflammatory neuropathies are those associated with an acute onset and rapidly progressive course (Guillain-Barré Syndrome – GBS) and those with a chronic course (Chronic Inflammatory Demyelinating Polyneuropathy – CIDP and Multifocal Motor Neuropathy – MMN). Other types of inflammatory neuropathies exist, but are less common.

Events for 2020

Please note: All events are listed on our [IN Group AU Meetup.com](#) page.

March meetup

Ashburton Library

Sun 22nd March @ 2 pm

June meetup

Ashburton Library

Sun 21st June @ 2 pm

September meetup (+ AGM)

Ashburton Library

Sun 6th September @ 2pm

December meetup (+ Christmas Luncheon)

Sun 6th December @ 12 noon

You can also follow us on our Twitter account [IN_Group_AU](#) .

Any queries in respect to activities please call Melva Behr +61 3 9707 3278, Margaret +61 3 9802 5319 or email info@ingroup.org.au
